Wired Internet Access

You can use a network cable to plug in to your room wall socket if you are living in College accommodation.

**Do not unplug any college equipment in your room or connect your own wireless router under any circumstances! You will break the network!**

- Plug your computer in to the wall socket in your room. If you require a cable these can be purchased from the IT Office
- Disable your wireless adapter – only necessary while you complete the registration. Most laptops have a switch somewhere to do this
- Open Internet Explorer (or any other web browser) and load any **non-secured** web page - you will be redirected to the registration form below
  (If you are not automatically redirected to the form go to http://www.bbc.co.uk)
  - Fill in the appropriate section of the form
  - As directed, unplug your network cable for 30 seconds and then plug back in. You can now access the internet.
  - Please keep your device up to date with updates and patches.

**IF YOU ARE NOT AUTOMATICALLY REDIRECTED TO THE REGISTRATION PAGE**
- Make sure the website you are trying to load does not have anything after the end of the address and is not a secure site. For example:
  - http://www.bbc.co.uk
  - https://www.google.co.uk/
